Energy Medicine Residential Retreat

2019 Website Program Description

Learn healing techniques for yourself and others using Expanded-Field Reiki, Hemi-Sync®, Spatial Angle Modulation™ (SAM) and Biofield Imaging!

You can earn Reiki I, II and Reiki Master certifications when you join us for this week-long workshop that will turbo charge your healing abilities. Whether you simply want to alleviate your own pain or you're a Reiki seasoned healer with years of practice (Reiki Masters often attend our courses), you'll be amazed how literally seeing what you're doing increases your ability to sense and direct healing energy to where it is needed most.

Quickly improve your ability to sense energy fields, readily access guidance from higher sources, and rapidly expand and amplify/intensify your energy field.

But we don't stop with visual imaging. We also introduce you to crystal therapy and chakra clearing techniques, as well as a combination of Hemi-Sync and SAM exercises so you learn how they influence and interact with living biofields as well.

When you can't physically see or sense what you're dealing with, energy healing may be difficult to master.

Everyone has an innate ability to heal themselves and others, but for most people, it remains limited and unrealized. This course is specially designed using a combination of subtle energy training and advanced sound and imaging technologies, allowing you to expand your energy field enormously at will.

This course handily solves that problem through the use of energy sensing exercises and biofield imaging. We use special video equipment to show you real-time, color imaging that enables you to physically see healthy and unhealthy energy patterns and the direct effects of different healing treatments.

What happens when you put the world's biggest crystal on an energy vortex? Magic!

Energy healers surrounding immense crystal sending healing energy to recipient undergoing major surgery at the University of Virginia Medical Center. Note bright white healing light energy emitted at the end captured by Biofield Imaging. This imaging technique is used throughout the course.

Watch the biofield imaging video to the end to see the brilliant burst of white light.

This crystal is behind Bob Monroe's home on Roberts Mountain. It is the world's largest single quartz crystal at 23 tons and listed in the book of Guinness World Records per Rick Ralston. The training facility, formerly Robert Monroe's home, is on the top of an energy vortex.
